### Description

The ABSOLUTE caliper with load cell for measuring elastic workpieces offers you the following advantages:

- Due to the low and constant measuring force, it is ideally suited for measuring elastic materials such as plastic and rubber parts which cannot be measured with a standard caliper with repeat accuracy.
- Digit height: 9 mm (fatigue-free measurement thanks to high-contrast LCD)
- The ABS (ABSOLUTE) scale requires no origin setting after power up and has no traversing speed limit.

- Exceptionally long battery life
